Maximum Cutout

STRUCTURAL COMPOSITE LUMBER CORE DOORS

May have multiple mid-rails,
horizontal or vertical with 2"
minimum.

THE GT SERIES DOOR

ADVANTAGES AND FEATURES

1. Doors up to 4-0 x 9-0 can be provided with full glass cutouts (for interior use only) and still maintain full door warranty with standard hardware and no concealed vertical rods.
2. Stability of particle core with the strength and screw retention greater than stave core.
3. Eliminates telegraphing problems associated with stave core.
4. More suitable for exterior applications than particleboard or stave core.
